

Subspot-grid pulsing — sequential vs interleaved (us intrinsic (1 MHz, 30 MPa); 35 spots, 40 pulses/spot, PRF 200 Hz)

(A) Coverage vs time
shielding efficacy: seq=0.22, inter=1.00

(B) Peak ΔT /subspot — SEQUENTIAL
max 49.7 K

(C) Peak ΔT /subspot — INTERLEAVED
max 5.1 K
