

Histotripsy on real CT — focal pressure, regime-specific dose map, and distance-weighted cavitation-dose heatmap
(GTV = full dose; CTV/PTV margins decay linearly to 0 at PTV edge; cyan=GTV, yellow=CTV +5 mm [HOPE4LIVER], white=PTV +8 mm total)
OAR contours: red=vessels, orange=gallbladder, magenta=capsule (dashed), amber=extrahepatic, darkred=bone
